

CBT Platform - New Features & Updates

1. Overview

We have successfully upgraded the CBT (Computer-Based Testing) platform with several exciting new features! These updates make the system faster, more secure, and easier to use for both students and teachers. Below is a simple breakdown of everything new in the system.

2. What's New For Students

- Modern Interface: A sleek dark mode design for better focus.
- Live Exam Timer: A synchronized countdown timer for all exams.
- Fair Play System: A strict anti-cheating rule that tracks switching tabs or leaving the screen. Three strikes will auto-submit the exam.
- Instant Results: Get final scores, correct answers, and step-by-step explanations immediately after finishing.
- Waiting Room: Enter exams 5 minutes early to read instructions safely.

3. What's New For Teachers & Admins

- Easy Exam Creation: Teachers can assemble exams with a click from a bank of over 97,000 questions.
- Smart Scheduling: Schedule exams for specific times and student groups.
- Automated Reports: Weekly performance reports are automatically sent to parents.
- Analytics Dashboard: View average scores, peak engagement, and detailed attempt data through simple charts.
- Multi-Tenant Support: Colleges can securely manage their own students and exams without mixing data.

4. AI Question Generation

- AI Question Generator: An intelligent assistant helps create high-quality questions for JEE and NEET.
- Review Process: A new multi-step approval workflow ensures all AI-generated questions are reviewed by human experts before being used.
